PYCONES

2018

MÁLAGA

<5-7/OCT/2018> Málaga

Connecting the Python Community

6th Edition

What is PyConES?

PyConES is the main Python conference in Spain.

PyConES is the main Python conference in Spain. After five successful editions in Madrid, Zaragoza, Valencia and Almería, the fifth edition of PyConES will be held from **5-7 of October in Málaga** following the format of the global PyCon event.

pycon.org

The conference will take place at the **"Teatinos Technology Complex of the University of Málaga" (School of Computer Engineering and the School of Telecommunications)** and will be organized by a joint effort between the Python Spain association, the local Python community, 'Yes We Tech' and Ebury.

.

<5-7/OCT/2018> Málaga

The event

PyConES is a three-day conference where professionals and Python programming language enthusiasts share their experience through many technical talks.

Because of its nature, PyConES audience come not only from tech sectors like web development, business intelligence or game development but also from the academic world, being useful for many teachers and researchers.

In this edition these tracks are being considered: web development, data science / big data, core (language), science, education, GIS, visualization, devops, security, ERP, art...

Some numbers

500 ATTENDEESS

+40 SPEAKERS

Besides all the conferences are published in "Python España's" YouTube Channel, getting almost 130.000 views and 2.300 subscribers.

The venue

The PyConEs 2018 will be hosted by the university of Malaga (UMA), which actually offers to their 30.000 students a total of 141 official studies.

The event will be placed in **"Completo Tecnológico Teatinos"**, where is located **the technical school of informatic engineer (ETSI)** and **the technical school of telecommunications engineering (ETSIT)**.

Both sites, pioneers in the informatic university studies offert in Andalucía, have by mission and goal the trainee of professionals in all the engineer senses. Since its foundation in 1987 and 1988, the schools keep an active collaboration with their social and economical environments though the investigation projects and contracts of tecnologic transfers that their people and investigators develop.

The city

Malaga is worldwide known by the plenty of beaches and perfect atmosphere for spending the holidays in "La costa del Sol", with more than 1,3 M of tourists per year, it also offers a plenty of cultural and business possibilities, and a consolidated infrastructure for the companies and professionals in the tech area, located in the University, and also in the city center and in "Parque tecnologico de Andalucia". It is the fifth city in Spain in numbers of habitants, and its population is around 568.000 people, although the metropolitan area is close to one million.

In addition, getting there is easy and accessible with a multitude of connections by airport, train, port or highway / highway. The historic city center concentrates the points of greatest cultural interest, which makes the visit a beautiful walk through its central pedestrian streets, where you can also enjoy the gastronomic offer.

Why to sponsor?

Sponsors make this event happen

Sponsorship allows us to offer more affordable tickets in order to enhance participation and attendance.It makes feasible to record the sessions the talks to reach a bigger audience. Sponsors help the whole Python community by fostering competitiveness and inclusiveness. It makes Python development more interesting for professionals and companies.

Visibility and recruitment

Sponsoring companies get visibility and positioning. PyConES is the best place to find the most qualified Python developers in Spain.
The Business lounge will be located close to the places where talks will be held. Having a booth in our business lounge will give your company the opportunity to increase company visibility, showcase its products, find talented professionals for recruiting and integrate with the python community.
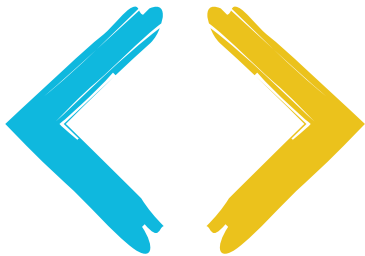

The contribution of each level of sponsorship does not include taxes.

***. Booth staff will have a 40% discount on conference tickets for 2 people.

The organization

PyConES is an initiative of Python Spain association, a non-profit organization established in 2013 by volunteers around the country. Its aims are to promote the use of Python programming language in Spain, to be a meeting point for people interested in it and to support them to the best of their abilities.

The 2018 edition is possible thanks to the volunteers and the local community in Malaga - Malaga Python, Yes We Tech and Ebury with the Python Spain Association - which they are carrying out this year to make the conference a success.
